SYMPOSIUM-IN-PRINT

PHOTOSYNTHETIC ANTENNA SYSTEMS

Guest Editors

Hugo Scheer and Siegfried Schneider

Contents

Hugo Scheer and Siegfried Schneider	1	Introduction
Purple bacteria		
Gregory J. S. Fowler, Wim Crielaard, Ronald W. Visschers, Rienk van Grondelle and C. Neil Hunter	2	Site-directed mutagenesis of the LH2 light-harvesting complex of *Rhodobacter sphaeroides*: changing βLys23 to Gln results in a shift in the 850 nm absorption peak
René A. Brunisholz and Herbert Zuber	6	Spectral modifications of bacterial antenna complexes by limited proteolysis
F. A. M. Kleinherenbrink, P. Cheng, J. Amesz and R. E. Blankenship	13	Lifetimes of bacteriochlorophyll fluorescence in *Rhodopseudomonas viridis* and *Heliobacterium chlorum* at low temperatures
Frank van Mourik, Kees J. Visscher, Jan M. Mulder and Rienk van Grondelle	19	Spectral inhomogeneity of the light-harvesting antenna of *Rhodospirillum rubrum* probed by triplet-minus-singlet spectroscopy and singlet-triplet annihilation at low temperatures
Dieter Leupold, Bernd Voigt, Michael Pfeiffer, Michael Bandilla, and Hugo Scheer	24	Nonlinear polarization spectroscopy (frequency domain) studies of excited state processes: the B800–850 antenna of *Rhodobacter sphaeroides*
Alexander Klevanik and Gernot Renger	29	Coherent motion and transfer of excitation energy in the primary processes of photosynthesis
N. R. S. Reddy, R. J. Cogdell, L. Zhao and G. J. Small	35	Nonphotochemical hole burning of the B800–B850 antenna complex of *Rhodopseudomonas acidophila*
Robert S. Knox and Demet Gülen	40	Theory of polarized fluorescence from molecular pairs: Förster transfer at large electronic coupling

Carotenoid systems

T. Gillbro, P. O. Andersson, R. S. H. Liu, A. E. Asato, S. Takaishi and R. J. Cogdell — 44 — Location of the carotenoid $2A_g^-$-state and its role in photosynthesis

Biliprotein systems

Harry A. Frank, Roya Farhoosh, Mila L. Aldema, Beverly DeCoster, Ronald L. Christensen, Ronald Gebhard and Johan Lugtenburg — 49 — Carotenoid-to-bacteriochlorophyll singlet energy transfer in carotenoid-incorporated B850 light-harvesting complexes of *Rhodobacter sphaeroides* R-26.1

S. Schneider, C.-J. Prenzel, G. Brehm, P. Gedeck, P. S. Maruthi Sai, L. Gottschalk and H. Scheer — 56 — A comparison of phycocyanins from three different species of cyanobacteria employing resonance-enhanced coherent anti-Stokes Raman spectroscopy

C. Scharnagl and S. F. Fischer — 63 — Reversible photochemistry in the α-subunit of phycoerythrocyanin: characterization of chromophore and protein by molecular dynamics and quantum chemical calculations

P. S. Maruthi Sai, S. Siebzehnrübl, S. Mahajan and H. Scheer — 71 — Fluorescence and circular dichroism studies on the phycoerythrocyanins from the cyanobacterium *Westiellopsis prolifica*

Mathias Hucke, Gerd Schweitzer, Alfred R. Holzwarth, Walter Sidler and Herbert Zuber — 76 — Studies on chromophore coupling in isolated phycobiliproteins. IV. Femtosecond transient absorption study of ultrafast excited state dynamics in trimeric phycoerythrocyanin complexes

Danuta Frąckowiak, Alfons Planner and Alina Dudkowiak — 81 — Delayed microsecond luminescence of phycobilisomes

Green bacteria

Xiaoyuan Lu and Robert M. Pearlstein — 86 — Simulations of *Prosthecochloris* bacteriochlorophyll *a*-protein optical spectra improved by parametric computer search

Katsumi Matsuura, Masamitsu Hirota, Keizo Shimada and Mamoru Mimuro — 92 — Spectral forms and orientation of bacteriochlorophylls *c* and *a* in chlorosomes of the green photosynthetic bacterium *Chloroflexus aurantiacus*

Mette Miller, Tomas Gillbro and John M. Olson — 98 — Aqueous aggregates of bacteriochlorophyll *c* as a model for pigment organization in chlorosomes

Robert E. Blankenship, Peiling Cheng, Timothy P. Causgrove, Daniel C. Brune, Stephanie Hsiao-Hsien Wang, Jin-Ug Choh and Jian Wang — 103 — Redox regulation of energy transfer efficiency in antennas of green photosynthetic bacteria

Energy trapping

H.-W. Trissl, B. Hecks and K. Wulf 108 Invariable trapping times in photosystem I upon excitation of minor long-wavelength-absorbing pigments

Sandra Turconi, Gerd Schweitzer and Alfred R. Holzwarth 113 Temperature dependence of picosecond fluorescence kinetics of a cyanobacterial photosystem I particle

Peter Jahns and Wolfgang Junge 120 Another role of chlorophyll *a/b* binding proteins of higher plants: they modulate protolytic reactions associated with photosystem II

Algae

Roger G. Hiller, Pamela M. Wrench, Andrew P. Gooley, Grant Shoebridge and Jacques Breton 125 The major intrinsic light-harvesting protein of *Amphidinium*: characterization and relation to other light-harvesting proteins

A. Schmitt, A. Herold, C. Welte, A. Wild and C. Wilhelm 132 The light-harvesting system of the unicellular alga *Mantoniella squamata* (Prasinophyceae): evidence for the lack of a photosystem I-specific antenna complex

Higher plants

Harald Paulsen and Andrea Kuttkat 139 Pigment complexes of light-harvesting chlorophyll *a/b* binding protein are stabilized by a segment in the carboxyterminal hydrophilic domain of the protein

F. Gerald Plumley, Tracey A. Martinson, David L. Herrin, Masahiko Ikeuchi and Gregory W. Schmidt 143 Structural relationships of the photosystem I and photosystem II chlorophyll *a/b* and *a/c* light-harvesting apoproteins of plants and algae

Susanne Preiss, Gary F. Peter, Shivanthi Anandan and J. Philip Thornber 152 The multiple pigment–proteins of the photosystem I antenna

Th. Bittner, J. Voigt, K.-D. Irrgang and G. Renger 158 Nonlinear laserspectroscopic investigations of the pigment–pigment interaction within the light-harvesting complex of photosystem II

The following three papers were submitted for the Symposium-in-Print issue; revised versions were received with the printer's deadline for this issue; they will all appear in the next issue of *Photochemistry and Photobiology* (Volume 57 Number 2, February 1993):

Robin Ghosh, Luigi Cornacchia and Reinhard Bachofen Gene expression of the B875 light-harvesting prepolypeptides from *Rhodospirillum rubrum* in *Escherichia coli*

Erhard E. Pfündel Is zeaxanthin capable of energy transfer to chlorophyll *a* in partially greened leaves? A study of fluorescence excitation spectra during violaxanthin deepoxidation

Manuel Glauser, Walter Sidler and Herbert Zuber Isolation, characterization and reconstitution of phycobiliprotein rod-core linker polypeptide complexes from the phycobilisome of *Mastigocladus laminosus*

YEARLY REVIEWS

Evelyne Sage	163	Distribution and repair of photolesions in DNA: genetic consequences and the role of sequence context
John E. Frederick	175	Ultraviolet sunlight reaching the earth's surface: a review of recent research
Bridgette A. Barry	179	The role of redox-active amino acids in the photosynthetic water-oxidizing complex
Mathias O. Senge	189	Recent advances in the biosynthesis and chemistry of the chlorophylls
David C. Fork and Stephen K. Herbert	207	The application of photoacoustic techniques to studies of photosynthesis

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 57 ISSUE 2 FEBRUARY 1993

Contents

Obituary—Robert W. Tuveson	221	
Articles		
M.-T. Martin, A. Valla, M. Giraud, J.-P. Brouard, P. Morliere, J. Haigle and R. Santus	222	Structures of the bergamottin photoproducts
Benjamin Ehrenberg and Eliyahu Pevzner	228	Spectroscopic properties of the potentiometric probe merocyanine-540 in solutions and in liposomes
Veronika Logovinsky, A. D. Kaposi and J. M. Vanderkooi	235	Fluorescence line narrowing spectroscopy of Zn porphyrins
Nancy L. Oleinick, Antonio R. Antunez, Marian E. Clay, Boris D. Rihter and Malcolm E. Kenney	242	New phthalo ⁻nine photosensitizers for photodynamic therapy
Thomas A. Dahl	248	Direct exposure of mammalian cells to pure exogenous singlet oxygen ($^1\Delta_g O_2$)
Ed Robert Blazek, James L. Alderfer, Walter A. Tabaczynski, Vassilis C. Stamoudis, Mark E. Churchill, Jennifer G. Peak and Meyrick J. Peak	255	A 5-4 pyrimidine–pyrimidone photoproduct produced from mixtures of thymine and 4-thiouridine irradiated with 334 nm light
Y. M. Denkins and M. L. Kripke	266	Effect of UV irradiation on lethal infection of mice with *Candida albicans*
T. I. Quickenden and L. L. Daniels	272	Attempted biostimulation of division in *Saccharomyces cerevisiae* using red coherent light
Peter Hersey, Helene Magrath and Frank Wilkinson	279	Development of an *in vitro* system for the analysis of ultraviolet radiation-induced suppression of natural killer cell activity
Islam U. Khan, Keith D. Boehm and Craig A. Elmets	285	Modulation of interferon-gamma-induced HLA-DR expression on the human keratinocyte cell line SCC-13 by ultraviolet radiation

Robert C. Richmond and Julia A. O'Hara	291	Effective photodynamic action by rhodamine 123 leading to photosensitized killing of Chinese hamster ovary cells in tissue culture and a proposed mechanism
David Kessel, Greta M. Garbo and James Hampton	298	The role of lipoproteins in the distribution of tin etiopurpurin (SnET2) in the tumor-bearing rat
M. Djavaheri-Mergny, J. C. Maziére, R. Santus, L. Mora, C. Maziére, M. Auclair and L. Dubertret	302	Exposure to long wavelength ultraviolet radiation decreases processing of low density lipoprotein by cultured human fibroblasts
M. R. Arnfield, J. D. Chapman, J. Tulip, M. C. Fenning and M. S. McPhee	306	Optical properties of experimental prostate tumors *in vivo*
J. L. Hott and R. F. Borkman	312	Concentration dependence of transmission losses in UV-laser irradiated bovine α-, β_H-, β_L- and γ-crystallin solutions
J. Braun and M. Tevini	318	Regulation of UV-protective pigment synthesis in the epidermal layer of rye seedlings (*Secale cereale* L. cv. Kustro)
A. A. Krasnovsky, Jr., P. Cheng, R. E. Blankenship, T. A. Moore and D. Gust	324	The photophysics of monomeric bacteriochlorophylls *c* and *d* and their derivatives: properties of the triplet state and singlet oxygen photogeneration and quenching
Zhan-Gong Zhao and Gordon Tollin	331	Vectorial electron transport across lipid vesicle membranes driven by two photoreactions. I. Ethylenediaminetetraacetic acid as an electron donor *via* flavin triplet state in the inner compartment and cytochrome *c* as an electron acceptor from chlorophyll triplet state in the outer compartment
Zhan-Gong Zhao and Gordon Tollin	338	Vectorial electron transport across lipid vesicle membranes driven by two photoreactions. II. Photochemical regeneration of reduced cytochrome *c* by flavin triplet state and ethylenediaminetetraacetic acid in the inner compartment and reduction of ferredoxin by chlorophyll triplet state in the outer compartment
*Manuel Glauser, Walter Sidler and Herbert Zuber	344	Isolation, characterization and reconstitution of phycobiliprotein rod–core linker polypeptide complexes from the phycobilisome of *Mastigocladus laminosus*
*Robin Ghosh, Luigi Cornacchia and Reinhard Bachofen	352	Gene expression of the B875 light-harvesting prepolypeptides from *Rhodospirillum rubrum* in *Escherichia coli*
*Erhard E. Pfündel	356	Is zeaxanthin capable of energy transfer to chlorophyll *a* in partially greened leaves? A study of fluorescence excitation spectra during violaxanthin deepoxidation
Ana Lucia T. O. Nascimento, Jorge A. Escobar and Giuseppe Cilento	362	The peroxidative metabolism of tenoxicam produces excited species
Research Notes		
Mironel Enescu, Roxana Ionescu, Gheorghe Dumbraveanu and Mihai L. Pascu	367	Phosphorescence lifetime studies of interactions between serum albumins and sodium dodecyl sulfate
S. Biade, J. C. Mazière, L. Mora, R. Santus, C. Mazière, M. Auclair, P. Morlière and L. Dubertret	371	Lovastatin potentiates the photocytotoxic effect of photofrin II delivered to HT29 human colonic adenocarcinoma cells by low density lipoprotein
Umeo Takahama	376	Hydrogen peroxide-dependent generation of singlet molecular oxygen by human saliva: its detection by chemiluminescence from a *Cypridina* luciferin analog
Technical Note		
Ruth Blaney, Tahsin Al-Nakib and R. Jeremy H. Davies	380	A fluorogenic actinometer for nucleic acid photochemistry utilizing 1-deazapurine *N*(3)-oxides

*Papers submitted for the "Photosynthetic Antenna Systems" Symposium-in-Print (Volume 57, Number 1, January 1993) but accepted too late for inclusion in that issue.

Rapid Communications
